

EvenTeak[®] data sheet

EvenTeak[®] is a high quality veneer. Unlike standard fineline veneer, EvenTeak is made of real Teak Wood, which has been cultivated and legally harvested on plantations. EvenTeak is FSC[®] 100% certified. It looks, feels and smells like natural teak, but it is “even Teak”.

EvenTeak[®] dimensions:

- Thicknesses of 0.5/1.0/1.5/2.0/2.5mm
- length: 2600/3100 mm
- widths: between 40 to 47cm
- Veneers with 1.0 mm or more will be supplied with a fleece back

Info: We are currently developing new products such as crown veneer and solids

technical characteristics:

Density*	Min. 600kg/m ³
shrinkage dimension*	0.2% longitudinal, 4.9% transverse
glue	Perma-Flex SV-104
fleece	PWG Veneer Backer VC150+
Formaldehyde*	VOC test -> AgBB requirement fulfilled (EN 16516)
FSC [®] 100% certificate	FSC [®] 100%

We have tested our product to give a realistic overview of the individual properties. The information is based on tests carried out with the material testing institute MPA Eberswalde (marked by *) and our current knowledge and experience. A legally binding assurance of certain properties and their completeness or suitability for a specific processing and application cannot be derived from our information. All product information contained in this document must be reviewed and tested by the user for suitability for the user's own particular purpose or application.
